

ONLINE INDUSTRY WORKSHOP

# Smart Production in Microelectronics

## 19 September 2023, 10:00-11:10 am

Infineon is excited to meet microelectronics INDUSTRY 4.0:  
“Smart Production in Microelectronics”

A workshop on Smart Production organized by the global company Infineon and ADVANTAGE AUSTRIA Bulgaria will delve into the challenges faced and the innovative solutions developed.

- Smart Production: What defines a smart production?
- What capabilities are required to drive a world class semiconductor FAB?
- Get an insight of Infineon newest wafer Fab and its automation and Industry 4.0 journey
- A short outlook on next upcoming challenges.

The workshop offers an interactive platform to connect industry, research/education and Infineon to explore future collaboration opportunities to tackle challenges in the field of Smart Production.

### Industry Workshop

10:00-10:05	<b>Welcome</b> <i>Philippe Kupfer, ADVANTAGE AUSTRIA Bulgaria</i>
10:05-10:15	<b>Introduction</b> <b>Infineon Technologies Austria &amp; Start Up's by</b> <i>Andreas Mühlberger, Infineon Technologies Austria</i> <b>about IPCEI, Marcus Borrmann, NXP</b>
10:15-11:00	<b>Industry 4.0, Smart Production</b> <i>Richard Lippe &amp; Heinz Veitschegger, Infineon Technologies Austria</i>
11:00-11:10	<b>Q &amp; A</b>

Language: English

Register until 18 September 2023

Places are limited

Infineon is a globally leading semiconductor player with more than 50.000 employees. We are leading in automotive, power management energy efficient technologies and the IoT while Global megatrends underline the increasing importance of microelectronics.

IPCEI on Microelectronics is the largest pan-European initiative in the field of microelectronics. It opens significant opportunities for universities, research institutions, industry representatives, start-ups and engineering students from across Europe to address technological, market and societal challenges that could not otherwise be tackled. Together with NXP and AT&S, Infineon Austria is part of this strategic effort of the IPCEI on Microelectronics in Austria.

We call it our Mission Future. You, too, can join our Mission Future and benefit from many opportunities! For more information about our Mission Future and IPCEI Microelectronics, visit [www.infineon.com/ipceimeustria](http://www.infineon.com/ipceimeustria)
